

Safety Barriers

Single-channel safety barriers

9001/00-083-442-101 Art. No. 158333

- For the intrinsically safe operation of a wide range of devices, such as HART transmitters, solenoid valves, sensors, contacts and many more
- Compact, space-saving devices that are easy to install on a DIN rail
- Quick and efficient installation as barriers can be simultaneously snapped onto DIN rail and connected to ground (ISA - RP12.06)
- Convenient maintenance and repair through back-up fuse feature

WebCode **9001A**

The 9001 series INTRINSPAK single-channel zener barriers enable the intrinsically safe operation of virtually all field devices. The comprehensive portfolio and the combination of zener barriers cover a wide variety of signals. The devices are incredibly robust and require little space. The back-up fuse is a convenient feature as it is standardized for all variants.
