

## Pneumatic Crimping Machine - UP 60

Designed for loose piece crimp applications up 120mm<sup>2</sup>, (4/0), the UP60 with a crimp force of 7.5 Tons provides excellent flexibility and performance. Available adapters allow for the use of Panduit CD-2001 and CD-920 die sets. The toolless die/adaptor system allows for a quick changeover for a wide variety of standard and custom applications. This powerful machine in a small footprint will provide increased flexibility and capabilities to your manufacturing floor.

### Key Features

### Benefits

Innovative Design	Compact design and low weight
Reduced process time	Adjustable stroke
Process Reliability	Forced sequence control ensures additional process quality
LED Lighting	Easy access for on/off options
Electric Piece Counter	Production quantity is recorded
Low-Maintenance	Simple, face and cost saving
Die-Set Selection	Variety of die-set solutions available
Standards	CE-Compliant

## Hydraulic Crimping Machine – UP 65

Designed for loose piece crimp applications up 300mm<sup>2</sup> (500 MCM), the UP65 with a crimp force of 17.5 Tons provides excellent flexibility. Available adapters allow for the use of Panduit CD-2001 and CD-920 die sets. The toolless die/adaptor system allows for a quick changeover for a wide variety of standard and custom applications. This powerful machine in a small footprint will provide increased flexibility and capabilities to your manufacturing floor.
