

Ceiling Light Installation Manual

Thank you for buying our top-quality ceiling light. Only a qualified electrician can install the ceiling light. Please read all instruction terms before installation and follow the terms strictly.

Note: Please install as the installation manual shows to avoid fire, electric shock and accidents.

Notes

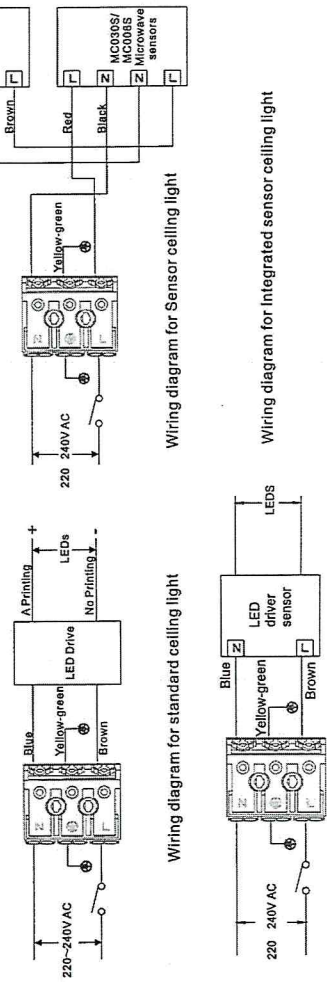

- ◆ For only indoor use instead of outdoor and vibrating place etc to avoid fire, electric shock and accidents;
- ◆ No self-modification or parts changing or it would lower the lifespan or cause safety issues;
- ◆ If accident occurs, please cut off the power supply and have qualified electrician check and repair the products;
- ◆ Don't install it above the stove, gas oven and exhaust funnel to avoid accidents;
- ◆ No usage of dimmer switch unless there is a mark on it;
- ◆ If it can't light up, please check the wiring;
- ◆ No installation on the following places:

Main structure and Application

1. Adopt newly-imported PMMA material and LED source with high brightness. More tender light and eco-friendly;
2. Side-emitting light way make well-distributed light;
3. Fashionable and simple design conforms to modern life;
4. Unibody heat emission structure contributes to low light failure and long lifespan;
5. Surface mounted, easy for installation and maintenance;
6. Built-in microwave sensing function, more intelligent, allowing it to automatically light up when it senses people and light off or drop to 20% brightness when people leave, more convenient and energy-saving.
7. Be widely used in place with Hotels, Meeting rooms, Factories and offices, Commercial lighting, Residential and public facilities.
